SURVEY OF INDIA.

NOTIFICATION.

Calcutta, the 1st April, 1887.

The following rules and regulations for the issue and receipt of instruments from the Calcutta Mathematical Instrument Office, and revised Priced List of Instruments, are published for the information and guidance of Public Officers.

By Order,

D. MACDONALD, Colonel, S.C.,

Assistant Surveyor-General,

In charge Surveyor General's Office.

Rules and Regulations of the Mathematical Instrument Office, Survey of India Department.

The Mathematical Instrument Office, Survey of India Department, supplies new and serviceable instruments, &c., and repairs, examines and adjusts, &c., old ones, on book-debit, for all branches of the public service. As a general rule new instruments are not supplied if serviceable instruments of the class required are available for issue.

2. All applications for instruments on the public service must be submitted on the following indent form, which is not required in duplicate, the specification of instruments and particular purposes for which required being made as full as possible. Indent forms may be had on application being made to the Mathematical Instrument Office.

*Indent No. on the Calcutta Mathematical Instrument Office, S. I. Dept., Calcutta, for
Instruments required for the use of dated 188 .*

Description of Instruments.	Quantity or number in use or in store.	Quantity or number intended for.	Purpose for which required.	Average cost as per printed list.		How and where to be despatched.
				R	a.	
						The address which should be affixed to the parcels or cases to be distinctly given in full. Abbreviations sometimes lead to mistakes.

I do hereby certify that the articles specified in this indent are indispensably necessary for the purposes set forth, according to the best of my knowledge and belief, after the most careful examination.

Recommended.

Countersignature of approving authority.

Signature of Indenting Officer, with designation of appointment in full.

3. All indents must be duly approved and countersigned by the heads of departments, or of the Government under which indenting officers may be serving, before they can be supplied, *viz.* :—

and they should be addressed to the Officer in charge Government Mathematical Instrument Office, No. 9 Part Street, Calcutta.

4. The mode of transit, and address, or station to which the instruments are to be consigned, must invariably be specified on indents in the proper column. Indents should not be accompanied with forwarding letters, unless more explanation is necessary than can be given on the face of the indent.

5. All officers, to whom instruments and other stores are issued on public service, have to account for them to the officer to whom their accounts are rendered, in such manner as may be by him directed.

6. All instruments, and component parts of instruments, when no longer required, should be at once returned to the Mathematical Instrument Office, except when the Officer in charge considers that their transit charges may nearly equal, or exceed, their actual value as material; in which case, he should refer to the Officer in charge Mathematical Instrument Office for instructions as to their disposal. No unused instruments should be allowed to accumulate in any office, as, if returned, they can be utilised for re-issue.

7. When instruments are considered unserviceable by any officer, a survey should be held on them by a committee of Government officers, whose report should be forwarded to the Assistant Surveyor General, in charge of Mathematical Instrument Office, who will issue instructions as to which of the articles are to be forwarded to the dépôt, Calcutta, and which should be sold by public auction to the best advantage. The proceeds of all articles sold by auction must be deposited in the nearest treasury, and the treasury receipt, with auction account sale, and copy of the committee report, should be attached to the next cash account current, in which the transaction should appear both on the debit and credit sides.

8. When instruments are received for final deposit in store, a valuation receipt will be granted for them by the Officer in charge Mathematical Instrument Office, to enable officers, from whom received, to remove them from their debit, by forwarding the receipt to the Comptroller of India Treasuries, with the half-yearly or other returns of stores submitted to him.

9. All Government instruments, &c., requiring repair, &c., should be forwarded with an official letter or repair indent.

10. All instruments, &c., received from England and issued on book-debit on the public service, will be charged at their invoice cost, plus a percentage to cover freight, insurance, loss by exchange, &c.

11. Instruments made in the workshops, and those purchased locally for issue on book-debit will be charged at cost rates. Instruments purchased locally for officers not entitled to receive them on book-debit will be charged at cost price plus 5 to 10 per cent. for examining, testing, and incidental charges.

12. Instruments, when they can be spared, are sometimes sold to officers in the service of Government on payment of their value, plus from 5 to 10 per cent.; and instruments, the private property of officers, are repaired, if necessary, on like terms. In such cases the amount must be remitted to the Officer in charge Mathematical Instrument Office, before the instruments can be despatched.

13. Instruments returned into store will be valued according to their condition on arrival at the Mathematical Instrument Office.

14. It should be distinctly stated in the forwarding letters, or on the face of delivery vouchers advising despatch of consignments to the Mathematical Instrument Office, whether the articles forwarded are "for repair" or "for deposit."

15. All consignments for the Mathematical Instrument Office should be forwarded "prepaid."

16. In the event of instruments indented for by Government officers not being available from the Mathematical Instrument Office stock, they can, if urgently required, be usually purchased in the local market. In such cases, however, the Government have ruled as follows:—"When instruments are purchased by the Mathematical Instrument Office in the local market at the request of any Department, they shall be paid for by the Department concerned by Remittance Transfer Receipt on presentation of the Bills (letter No. 430 S., dated 29th September 1883, from Revenue and Agricultural Department, to Surveyor General of India.)"

17. Officers and Departments entitled to issue of instruments on book-debit should never remit the price in cash or by Transfer Receipt, unless especially asked to do so by the Officer in charge Mathematical Instrument Office. The transfer of issues from book-debit to cash, and vice versa, causes great trouble in the adjustment of the accounts.

18. It is particularly requested that the size and description of instruments, length of scales, how divided, and purposes for which required, and generally any information, which will guide this Office in knowing, without further reference, the exact wants of the indenting officer, be entered, as far as possible, on the face of the indent, instead of in covering letters.

19. The following list shows the nomenclature of the various descriptions of instruments ordinarily kept in store in this Office for issue on public service. This nomenclature should be strictly adhered to in all indents.

20. To enable the indenting officer, as well as the officer who countersigns and finally passes an indent, to know the cost involved thereby, the average ordinary price of each description of instrument is also given in the annexed list. Indenting officers must invariably enter the value of all instruments required by them in the column of the indent allotted for that purpose.

21. The supply should be regulated, not according to what an officer would like to have, but by what is absolutely necessary.

Many scales are in use.

Many scales require a careful description. If there is the least doubt as to the correct denomination of a scale, the indenting officer should specify the number of divisions and sub-divisions in a given measurement, and the method of numbering, for instance 12" divided into 60 parts, numbered successively from 1 each part to be sub-divided into two.
